// PROFILE

Driven **Application Development** student with hands-on experience in web development, focused on building **scalable** and **user-centered digital solutions** that deliver real business value. Strong ability to translate user and business needs into intuitive, high-quality applications with an emphasis on **usability**, **efficiency**, and **performance**. Passionate about continuous learning, adapting to new technologies, and contributing to impactful projects in **collaborative environments**. Outside of coding, I compete in handball which has sharpened my ability to **perform under pressure** and collaborate in **fast-moving** team **environments**.

// WORK EXPERIENCE

Software Developer
Jul 2026 – Aug 2026

Melexis · Belgium · On-site

- Developed a **Python-based automated integration** that synchronized **hardware assets** between an **endpoint management platform** and an **IT asset management system** via **API connections**, with automatic creation and updating of records.
- This **reduced manual work** and **improved data consistency** across systems.

Intern Software Developer
Feb 2026 – May 2026

H.Essers · Genk

- Developed a **full-stack** email ingestion system integrating an **Outlook add-in** (Office.js) with a **Java 21 / Spring Boot REST API** using Microsoft Graph OBO OAuth2 flow and **Apache Kafka** for event-driven downstream processing.
- Implemented a **Kafka consumer service** with **deduplication**, **retry logic**, and **Dead Letter Queue** handling, and validated reliability through **unit/integration tests** and k6 **load testing**.
